PROFESSIONAL PROFILE

I'm a junior web developer and cybersecurity enthusiast that has built software projects related to Internet of Things, stock and expiring date management, and auditing of self-service companies. I've worked with frontend technologies such as HTML5, CSS3, JavaScript, ReactJS, and backend technologies such as Nodejs, Java servlets, Firebase, and MySQL.

EXPERIENCE

Netsoft   Mexico City

Developer Trainee   *09/2022 - Present*

- Develop custom functionalities of the Oracle NetSuite platform accordingly to the customer's requirements with the SuiteScript APIs.
- Create and maintain new features to a Point of Sale project deployed on Netsuite that serve different countries in Latin America.

HackMx2 Tecnológico de Monterrey   State of Mexico

Frontend developer   *04/2019*

- Hackathon organized by Tecnológico de Monterrey where I was part of a team that had to replicate the calculations page of the Konfio company (A company dedicated to online credits to SMEs) working with HTML5, CSS3, JavaScript, Java, and AWS Lambda.
